

Water Conservation Measures at TINT

Techno International New Town (TINT) is committed to **sustainable water management** through its green initiatives. The institution practices rainwater harvesting and borewell recharge to **conserve water and reduce dependency on external sources**.

These measures not only help in **maintaining the groundwater levels** but also reflect TINT's dedication to **caring for the planet**. By implementing these eco-friendly practices, TINT demonstrates its proactive approach to environmental conservation and sustainable resource management, ensuring a **greener future for the community**.
